SUMMARY

A motivated Computer Science graduate from Udayana University with a GPA of 3.88, specializing in Software Engineering and UI/UX Design. With a passion for technology and creativity, I focus on crafting user-friendly interfaces and efficient software solutions. Self-taught through various platforms, I continue to enhance my skills in programming and design. Based in Bali, I'm open to connecting and collaborating.

EDUCATION

Udayana University

Bachelor of Computer Science

Minors in User Interface and User Experience (UI/UX)

Cumulative GPA: 3.88/4.0

Relevant Coursework: Software Engineering, UI/UX Designer, Web Developer

Bali, Indonesia

June 2025

WORK EXPERIENCES

Kantor Desa Cemagi

Staff IT Intern

Bali, Indonesia

Jul 2023 - Sep 2023

- Contributed to the development of Desa Wisata Cemagi as a core internship project, focusing on building the frontend of the tourism website using React.JS and TailwindCSS.
- Collaborated with a team to create a user-friendly and visually appealing digital tourism platform.
- Assisted the community in Desa Cemagi with technical and administrative tasks related to correspondence.

PT. Hidata Teknologi Digital

Full Stack Developer Intern

Jakarta, Indonesia

Feb 2024 - May 2024

- Designed and developed Hidata.id, the official company website, with responsive and interactive layouts to enhance user engagement.
- Translated research insights into user-centric UI/UX designs, improving the website's functionality and aesthetics.
- Collaborated with the team to deliver client projects, ensuring seamless implementation and high-quality outcomes.

CV. Maiharta

Full Stack Developer Full Time

Bali, Indonesia

June 2025 - Now

- Managed end-to-end website development for various clients, taking ownership of planning, coding, and testing phases to deliver projects according to client specifications.
- Worked closely with the deployment team to ensure smooth website launches, contributing to technical setup, troubleshooting, and optimization for live environments.
- Developed customized web solutions that addressed specific client needs and objectives, incorporating features such as responsive design, database integration, and dynamic content delivery.

NEWGEN INNOVATION SDN. BHD.

Full Stack Developer Full Time

Kuala Lumpur, Malaysia

Mar 2025 - Now

- Architected and delivered comprehensive end-to-end web solutions for diverse client requirements, overseeing the entire software development lifecycle (SDLC)—from system design and logic implementation to rigorous testing and deployment.
- Engineered high-performance, dynamic platforms by integrating complex database schemas and responsive front-end architectures, resulting in improved system scalability and user experience for client business objectives.
- Collaborated cross-functionally to streamline deployment pipelines and application troubleshooting, ensuring high system availability and robust performance in production environments.

ORGANIZATION EXPERIENCES

HIMAIF Udayana

Member Education Division

Bali, Indonesia

Dec 2022 - Dec 2024

- Led the web design competition for the Informatics Festival and Competition (INVENTION) 2023. Responsibilities involved carefully organizing the competition guidebook, closely collaborating with esteemed judges, and conducting participant surveys to enhance the overall competition experience.
- Led the web development team in creating the Invention Udayana website, ensuring smooth collaboration and timely delivery.
- Developed Invention Udayana website as a Full Stack Developer, including slicing designs into interactive and functional web components.

Team Web HIMAIF Udayana

Backend Developer

Bali, Indonesia

Jun 2024 - Dec 2024

- Developed and maintained the backend of the HIMAIF Udayana website using Laravel, adhering to the MVC architecture.
- Built and optimized database structures for seamless data management and retrieval.
- Collaborated with the team to implement backend logic supporting website functionality and user interactions.

PROJECTS

Invention Udayana - Website

- Led the development of a web platform that digitized manual registration, successfully handling 278 teams from 108 institutions across 19 provinces.
- Orchestrated a robust system using Laravel and Tailwind CSS to manage complex data validation and high-traffic registration in real-time.
- Managed team workflows through strict time-blocking and asynchronous communication, ensuring project delivery alongside rigorous academic deadlines.

Hidata ID - Website

- Engineered a corporate website for PT. Hidata Teknologi Digital using React JS and Tailwind CSS, transforming Figma designs into a high-performance promotional platform.
- Successfully adapted to industry-standard development workflows and communication protocols within a professional team to ensure smooth project progression from research to deployment.
- Implemented Supabase to power the email contact feature and managed a dynamic tech stack to showcase the company's services and technical portfolio effectively.

ReproHealth - Website

- Transformed complex Figma designs into a high-fidelity, responsive website using React JS and seamless API integration.
- Enhanced user engagement by implementing advanced features beyond MVP requirements, including an AI Chatbot and a Notification system.
- Achieved additional merit points for technical complexity and high-quality UI/UX execution within a fast-paced team environment.

ACHIEVEMENTS

Favourite Winner | Web Design Competition - Informatics Festival and Competition (INVENTION) Udayana by Informatics Departmental Student Association, Udayana University

Nov 2022

National Third Winner | Hackathon Competition - Slash National Competition

by Student Executive Board of the Faculty of Computer Science, UPN Veteran Jakarta

June 2023

National Second Winner | Web Design Competition - Tikfest

by Informatics Departmental Student Association, PNJ University

Aug 2023

SKILLS

- **Technical Skills:** Web Development (Frontend & Backend), Fetch API, Responsive Design, UI/UX Design.
- **Soft Skills:** Problem Solving, Teamwork, Time Management, Creative.
- **Tools:** Github, Git, Figma, Firebase, Supabase.
- **Frameworks:** React.JS, Next.JS, Laravel, Tailwind, Bootstraps, Chakra UI, Antd Design, Shaden UI.
- **Languages:** Bahasa Indonesia (Native), English (Beginner to Intermediate).
